NOW THAT THE ROOT CANAL TREATMENT HAS BEEN COMPLETED

Patient Name _____ Phone _____ Email _____

Avoid eating or chewing until all numbness has worn off. Should you experience discomfort for a day or two, please do not be alarmed-this is common.

Ibuprofen (Advil, Motrin IB) or other similar strength analgesics (aspirin, Tylenol) should relieve the situation. Follow the directions on these over the counter medications. Soaking the treated area with a teaspoon of table salt in a glass of comfortably hot water helps reduce the inflammation. Avoid hard foods: ice, peanuts, etc.

The opening in the tooth through which root canal treatment was done has been sealed with:

- ☐ A permanent filling was placed (☐ amalgam ☐ resin ☐ build-up)
(☐ Crown needed ☐ tooth previously crowned ☐ no crown needed at this time)
- ☐ A temporary filling, it is important that you see your general dentist within the next few weeks to have the tooth permanently restored

Many times the treated tooth has been weakened by previous decay and fillings. It is often necessary for this tooth to receive additional protection in the form of a cast restoration (onlay or crown). Your general dentist is best qualified to determine how to restore your tooth. A note and radiograph are being sent to your dentist informing him/her that treatment has been completed.

Please call our office in approximately 6 months for re-examination. The progress of healing of your tooth and surrounding tissues will be evaluated. There will be a \$25.00 charge for this visit, to cover x-rays and infection control expenses.

If you have any questions or concerns about your treatment, please do not hesitate to call.

Our phone numbers are:

Harlingen: (956)-412-9500

Edinburg: (956)-994-9500

Dr. Rodríguez cell: (956) 279-3569

Dr. Treviño cell: (956) 279-0979
